## SBE 1.375" frame Carousel Frame Assembly Kit

### KIT CONTENTS

SBE P/N	Description	Primary SBE Application	QTY
231421	Rod, 1/2-13 Threaded, 18"	Secure and tighten Plates together	4
23714	SBE 32 Cage U-Bolt	Interface Extension Stand to Lower Guard	6
23715	SBE 32 Cage Flange	Interface Extension Stand to Lower Guard	6
23723C	SBE 24 Place Lifting Bail	Lifting Bail for Carousel	1
23922	SBE 32 Large Bail Insulator	Bail to Lower hub / Adapter Plate	4
23923	SBE 32 Large Bail Insulator	Bail to Upper hub / Adapter Plate	2
30044	Seacat Anode, 1"	6 used on plates, 6 used on guards, 2 used on extension stand	14
30409	Teflon Tape	Used on all strapping, and contact points of U bolts and flanges	4'
30666	Blue Moly	Used on all threaded hardware to prevent seizing of metal on metal	1can

### HARDWARE

SBE P/N	Description	Primary SBE Application	QTY
30210	Nut, 3/8-16 nylon stop	Extension stand U-Bolts; 1 on CTD bolt (30195)	12
30231	Nut, 1/2-13 Hex	18 on hub and guard bolts; 4 on each threaded rod	34
30257	Washer, 3/8" flat, SS, 7/8" OD max	Used with U-bolts	12
30259	Washer, 1/2" flat/narrow	2 on each Hub/Plate/Guard bolt (30603, 30612); 4 on each Rod	46
30594	Washer, 1/2" split ring	1 on each Hub/Plate/Guard bolt (30603, 30612); 4 on each Rod	34
30603	Screw, 1/2-13 x 3-1/2" Socket	hub to guard securing bolts	6
30611	Mach screw, 3/8-16 x 2" FH	Side bar securing screws	12
30612	Mach screw, 1/2-13 x 2-1/2"	Hub to Plate securing bolts	12
30615	Washer, 3/4" flat, SS	Used on Lifting Bail	4
30616	Washer, 3/4" Split ring lock	Used on Lifting Bail	4
30620	Nut, 3/4-10 NC Hex, SS	Used on Lifting Bail	4

### Kits:

SBE P/N	Description	Primary SBE Application	QTY
50199	Extension Stand CTD Installation Kit	Contains parts to mount a cage to the extension stand	1
50296	Deck Pad Kit	Contains parts to attach deck pads to frame	1

### SBE Drawings:

**40713.05** SBE32 1/375" Frame Assembly  
**40714H** Carousel Frame Parts Table  
**67117** Deck Pad Assembly

### Sea-Bird Electronics Procedure

PROCEDURE NUMBER: **67079**

TITLE: **SBE32- PN50115, 1.375in Frame Assembly Kit**

REVISION: **G**

EFFECTIVE DATE: **11/15/2010**

CHECKED BY: PC PAGE 1 of 5

**APPLICATIONS:***Accessory Parts*

SBE P/N	Part Description	Primary SBE Application	QTY
30044	Zinc Anode, 1"	3 on each adapter plate, 3 on each frame guard, 2 on ext. stand	14
30409	Teflon Tape	Wrap 8" around each position where a U-Bolt will go	4 feet
30666	Blue Moly NeverSeez	Apply liberally to ALL threaded areas that receive nuts	1 can

*Bottom Plate to Lower Guard*

SBE P/N	Part Description	Primary SBE Application	QTY
30259	Washer, 1/2" Flat/narrow	1 above plate, 1 below guard	12
30594	Washer, 1/2" split ring lock	1 below guard	6
30231	Nut, 1/2-13 Hex	1 below guard	6
30603	Cap Screw, 1/2-13 x 3-1/2" Socket Head	Secure lower plate to frame, outer ring, alternate with rods	6

*Hub to Adapter Plates*

SBE P/N	Part Description	Primary SBE Application	QTY
30231	Nut, 1/2-13 Hex	Pylon hub to top & bottom guards, 1 per bolt	12
30259	Washer, 1/2" flat/narrow	2 per bolt from hub to bottom plate; 1 per bolt from top plate to hub	18
30594	Washer, 1/2" split ring	1 on each Hub to Plate bolt	12
30612	Screw, 1/2-13 x 2-1/2" Socket	Adapter plates to hub	12

*Top Guard to Lower Guard*

SBE P/N	Part Description	Primary SBE Application	QTY
231421	Rod, 1/2-13, 18" length	Secure Outer ring on Plates together	4
30259	Washer, 1/2" Flat/narrow	16 used on rods	16
30594	Washer, 1/2" split ring lock	16 on rods	16
30231	Nut, 1/2-13 Hex	16 on rods	16
30611	Screw, 3/8-16 x 2" FH, SS, CS	Side pars, 2 per bar	12

*Pylon Lifting Bail*

SBE P/N	Part Description	Primary SBE Application	QTY
23723C	SBE 24 Place Lifting Bail	Lifting Bail for Carousel	1
23922	SBE 32 Large Bail Insulator	Bail to Lower hub / Adapter Plate	4
23923	SBE 32 Large Bail Insulator	Bail to Upper hub / Adapter Plate	2
30615	Washer, 3/4" flat, SS	Use at each lower hub insulator interface	4
30616	Washer, 3/4" Split ring lock	Use between flat washer and stop nut	4
30620	Nut, 3/4-10 NC Hex, SS	Above adapter plate to provide extra tension Below to secure in place	4

*Extension Stand*

SBE P/N	Part Description	Primary SBE Application	QTY
23714	SBE 32 Cage U-Bolt	Interface Extension Stand to Lower Guard	6
23715	SBE 32 Cage Flange	Interface Extension Stand to Lower Guard	6
30210	Nut, 3/8-16 nylon stop	Extension stand U-Bolts	12
30257	Washer, 3/8 flat	Extension stand U-Bolts	12
30409	Teflon Tape	Wrap 8" around each position where a U-Bolt will go	4 feet

**Sea-Bird Electronics Procedure**PROCEDURE NUMBER: **67079**TITLE: **SBE32- PN50115, 1.375in Frame Assembly Kit**REVISION: **G**EFFECTIVE DATE: **11/15/2010**

CHECKED BY: \_\_\_\_\_ PC \_\_\_\_\_ PAGE 2 of 5

**Note on Prep Work**

1. Many parts for the extension stand may already be installed.
2. All of the anodes may be installed.
3. Deck pads are installed.
4. Lifting bail assembly will not be installed on the hub, but the bail insulators may be installed.
5. All screws need a liberal amount of Blue Molly/Never Seez applied before installation.

**Carousel Frame Final Assembly**

*Refer to SBE Assembly drawing for details*

1. Clear off a large enough space, and cover the floor with carpet or cardboard to protect the paint on the frame.
2. Assemble the frame according to following instructions.

**A. Install and secure lower plate onto lower guard.**

1. Set the lower frame on 2x4's to allow access for hardware installation.
  - a. Brace the frame on no less than 4 equally spaces blocks to prevent tipping.
2. Install the bottom plate to the lower guard so that all the pins are facing up.
  - a. Align it so that the 2 largest holes on the plate are lined up with the same size holes on guard. (these are for the lifting bail that is installed later)
3. Secure with 6 bolts (30603), 12 flat washers (30259), 6 lock washers (30594), and 6 nuts (30231).
  - a. From the top-put each bolt through one flat washer then through the carousel frame, a second flat washer, a lock washer and finally the nut.
  - b. Positioning of the bolts goes:
    - large hole – bolt – empty hole – bolt – empty hole – bolt – large hole (around both ways)
    - For more clarification see the drawing.

**B. Install and secure Hub (with pylon removed).**

1. The end of the hub with the most holes installs towards the top.
2. Secure the hub to the bottom plate with 6 bolts (30612), 12 flat washers (30259), 6 lock washers (30594), and 6 nuts (30231).
  - a. From the top-put each bolt through one flat washer then through the hub and bottom plate, a second flat washer, a lock washer and finally the nut.

**C. Install and secure upper Plate.**

1. Install top plate so that the curved edge of outer ring is on top.
2. Line up the plate so that the large holes line up over the large holes in the lower plate.
3. Secure the top plate to the hub with 6 bolts (30612), 6 flat washers (30259), 6 lock washers (30594), and 6 nuts (30231).
  - a. From the top-put each bolt through the top plate and hub, a flat washer, a lock washer and finally the nut.

CHECKED BY: PC PAGE 3 of 5

**D. Install and secure upper guard.**

1. Install the upper guard over the top plate.
2. Line up the large holes with the large holes in the plate.
3. Secure to the lower guard directly with the threaded rods.
  - a. Slide the threaded ring through the upper guard and top plate.
  - b. Thread a nut (30231) far enough up the threaded rod that the top of the rod can be removed from the top plate and guard.
  - c. Then place a lock washer (30594) and a flat washer (30259) (in that order) onto the bottom of the threaded rod before inserting it into the hole in the bottom plate.
  - d. Thread a nut, a lock washer, and a flat washer onto the top of the threaded rod. Move them far enough down the threaded rod that the top of the rod will once again be above the upper guard when it is through the hole.
  - e. Put the top of the threaded rod through the hole in the top guard and plate.
  - f. Thread a flat washer, lock washer, and nut onto the top and bottom of the rod. (as they come through the plates/guards).
    - *The lock washer always goes against the nut.*
  - g. Repeat for the other three threaded rods.
    - *Do not tighten the nuts down at this time.*
4. The side bars are secured to upper and lower guards with 1 bolt (30611) on each end.
  - a. There are two different styles of side bars one has 1 arc on each end the other has 1 arc on one end and a double arc on the other.
  - b. The 3 bars with single arcs on both ends line up under the three bars on the upper guard.
    - *The arced area goes over the outside of the carousel guard frame.*
  - c. The other 3 bars go in the remaining places, with the double arc end attached to the upper guard.
5. Tighten down the hardware on the threaded rods.

**E. Install lifting bail (kit 50115 only).**

1. Install the two large 1.85" bail insulator (23923) from the top into the large holes in the upper guard/top plate.
  - a. The flange will rest on the top.
2. Install the four 1.2" bail insulator (23922) into the large holes in the bottom plate/lower guard.
  - a. Two go in from the top, the other two from the bottom.
3. Insert the two legs of the lifting bail into the upper bail insulators.
4. Thread on a nut (20620), a lock washer (30616), and a flat washer (30615) (in that order) onto each leg of the lift bail.
  - a. Thread these up far enough that the spacers on the top of the lifting bail are sitting on the surface of the upper bail insulators.
5. Feed the legs of the lift bail through the bottom plate and lower guard.
6. On the bottom of the lift bail install a flat washer, a lock washer, and a nut. Tighten these down.
7. Tighten down the nuts on the top of the bottom plate.
  - a. The nuts should be tightened down on the top and bottom of the bottom plate/lower guard.

**F. Install CTD cage into extension stand per drawing 40683.**

1. Place the extension stand, deck pad side down, onto the floor.
2. The CTD and cage installs into the frame per drawing 40683 with pre-installed hardware.
  - a. You will need to remove the hardware and use it to install the cage.
3. Any external sensors may be mounted later for safety, or now for convenience.

**G. Install the carousel onto extension stand per assembly drawing 40713.**

1. Wrap the top bar of the extension stand with 1" wide Teflon tape (pn 30409).
  - a. Six (6) locations total evenly spread out around the extension stand.
  - b. Wrap each location 2-3 times.
2. Use a winch to lift the carousel and set it on the extension frame.
  - a. If a winch is not available have 4 or more people lift the carousel and set it on the extension frame.
  - b. Line up the support bars with the extension stand uprights.
3. Wrap the surface of the lower guard with 1" wide Teflon tape corresponding to the tape on the extension stand.
4. Secure each location with one u-bolt, one cage flange, two washers (30257), and two nuts (30210).
  - a. Place the u-bolt over the lower guard then the extension frame, then place the cage flange over both legs of the u-bolt; one washer and one nut, in that order, are placed over each leg of the u-bolt and tightened down.
